

# Pathfinder Solutions MDD Mentoring Services

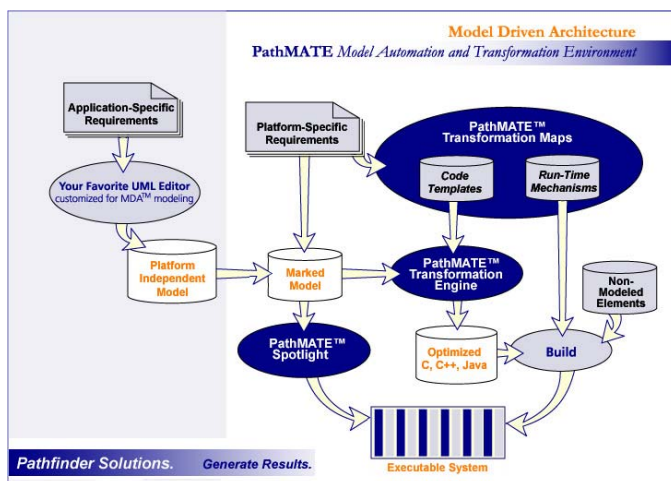

*Industry-renowned and field-proven Model Driven Development expertise*

Building complex, high performance systems is more than just difficult – it requires vision, focus and diligence. So you've turned to model-driven software development technologies to help. A good step - but that itself is no guarantee of success.

The landscape is littered with failures – promising projects that started off with the best of intentions, only to be overwhelmed by unanticipated pitfalls, technology limitations, even human nature. Optimistic enthusiasm and the newest tool are no substitute for *hard-earned experience* on real-world projects. You want someone who has been there and done that to let you in on what it really takes to make it all work.

Who do you turn to? Someone who has the chops - a solid record of success. Someone with experience building the kind of systems you build. Someone who knows how to get your team on track fast, and then help keep them running true. Most of all, you want someone with a passion for this stuff.

## Pathfinder Solutions.

*Our Expert MDD Mentoring will help your team architect, build and deploy your high-performance system quickly, with quantum gains in productivity and quality.*

*Take us with you. Generate Results.*

## DEEP EXPERIENCE

Our staff members have architected dozens of systems with customer teams, and then gone on and solved the myriad of problems on the way to their successful deployments. Our successes improve lives daily - they take you to work, save lives, defend our country, carry your phone calls and a lot more. We are right there with our customers, feeling the satisfying ache of good, hard work. As you start your journey, bring us along for what our earlier customers have taught us.

## PROVEN METHODOLOGY

Install the latest tool, stand back and watch success roll in - right? Not quite. Getting the most from MDD technology requires a shift from code-focused paradigms to a model-driven methodology that delivers quantum business gains. Build consistent results with a proven methodology that ties together effective techniques like Logical Architecture, Aspect Orientation, Platform Independence, flexible redeployment, Agile Modeling, automated test-first development and Dynamic Verification. Take full advantage of process automation and governance technology to maximize productivity and system quality. Our customers have doubled productivity\* and reduced defects by over 90%\*\*.

You can, too. Achieve success on a proven path.

## SINGULAR FOCUS

Our team has been focused on building complex systems with model-based approaches and technologies since the 80's. We formed Pathfinder Solutions with the singular focus of delivering game-changing business results with a proven model driven approach. It's all we do - we have a passion for this stuff.

*"They have 'been there and done that', and the expertise and enthusiasm they bring have boosted our team to really pick it up a notch. I can't even count all the ways they have helped us succeed."*

*Bill W., Architecture Lead  
Abbott Laboratories*

\* Customer measured results on 12 month initial-adoption project, including training time and learning curves; subsequent gains are higher

\*\* Customer measured results - number of defects reported from end of unit test through development integration phase.
